

Project Plan

Pracheth, Varun SG, Varun SR, Varun HR

September 14, 2022

1 Lifecycle

This project will be developed using the incremental model. This is because the core functionality itself is relatively basic, and most of the functionality advertised is implemented by means of extensions.

2 Tools

- Planning tool: Jira
- Version control: Git
- Development tool: Node, NPM, Visual Studio Code

3 Deliverables

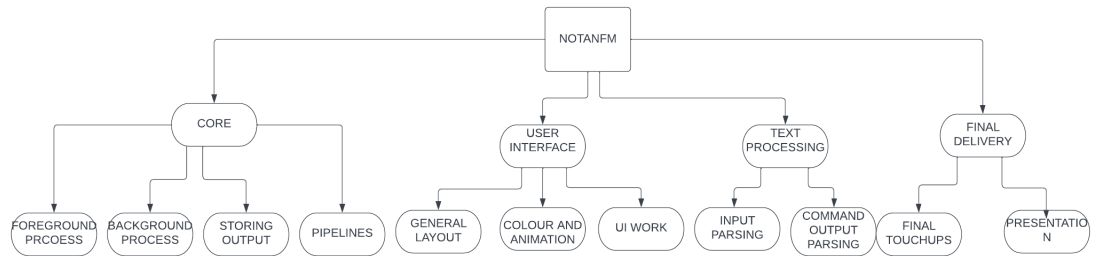

3.1 Build Components

- Functions to launch processes
- A set of CSS classes for formatting output
- A set of CSS classes for parsing input
- A set of functions for parsing the output of the program

3.2 Reuse Components

- Electron
- `child_process`

4 WBS

5 Gantt Chart
